

SQL Server Express 2008 R2 Edition Installation

The following document will cover the installation of SQL Server Express 2008 R2 Edition.

Before beginning the installation please download the SQL Server Express 2008 R2 installation file from:

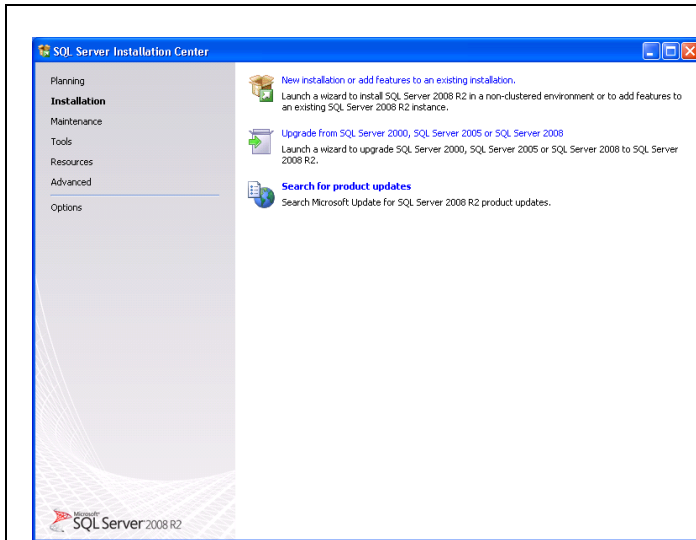

<http://download2.pcamerica.com/components/32bit%20SQL%202008%20EXPRESS.exe>

32bit install

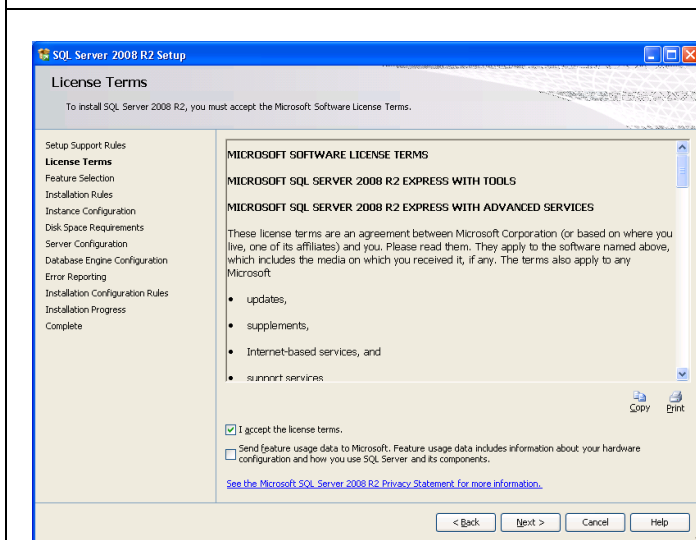

http://download2.pcamerica.com/components/x64/SQLEXP2008_x64_ENU.exe

64bit install

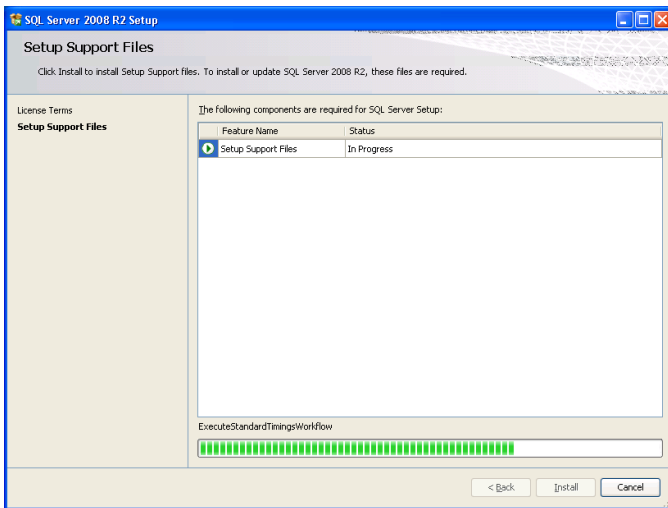

Installing SQL Server Express 2008 R2

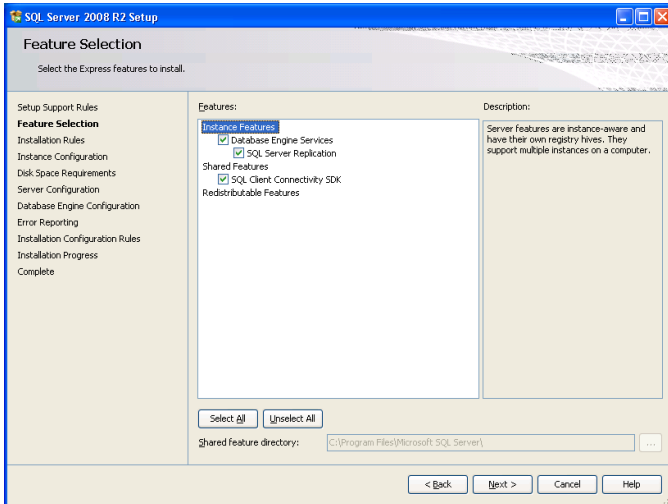

1. Select **Installation** then, select **New installation or add features to an existing installation.**

2. Select **I accept the license terms.**
3. Select **Next.**

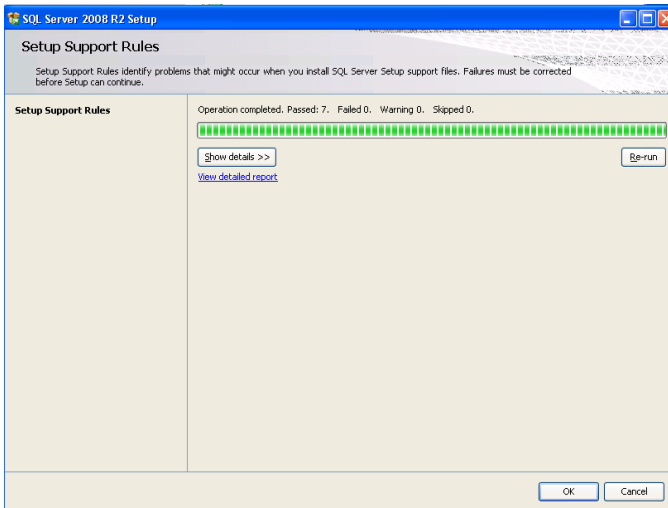

4. The Setup Support Files will then be installed.

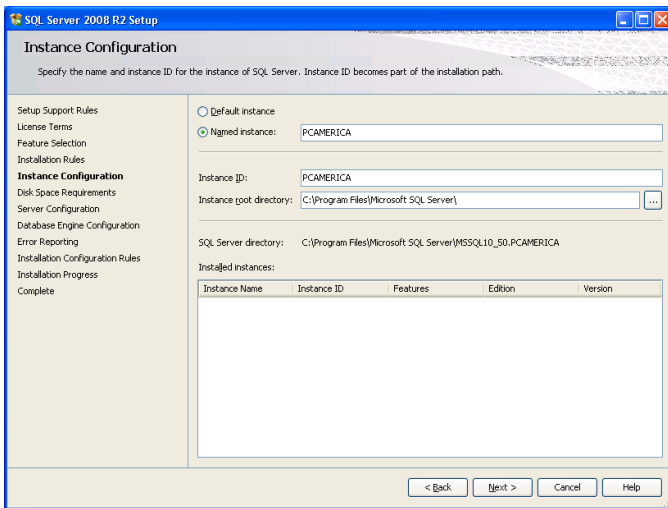

5. Make sure the following components are checked:

- **Database Engine Services**
- **SQL Server Replication**
- **SQL Client Connectivity SDK**

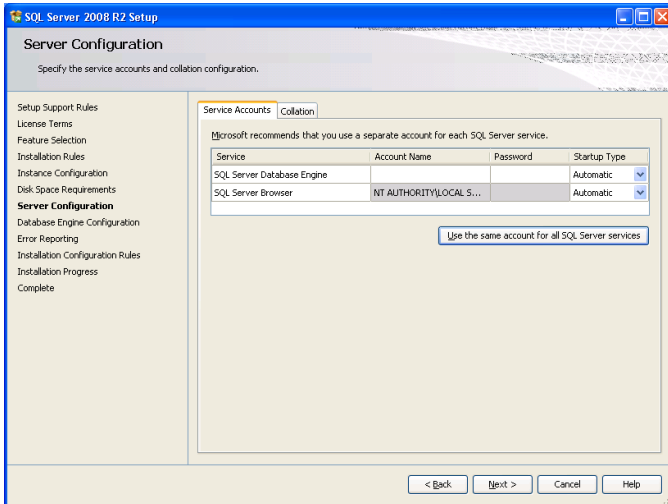

6. In order to continue with the installation you will need to see **Operation completed. Failed:0.**

7. Select **OK.**

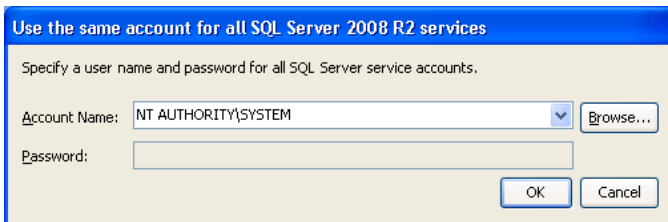

8. Select **Named Instance** and enter **PCAMERICA**.

9. Select **Next**.

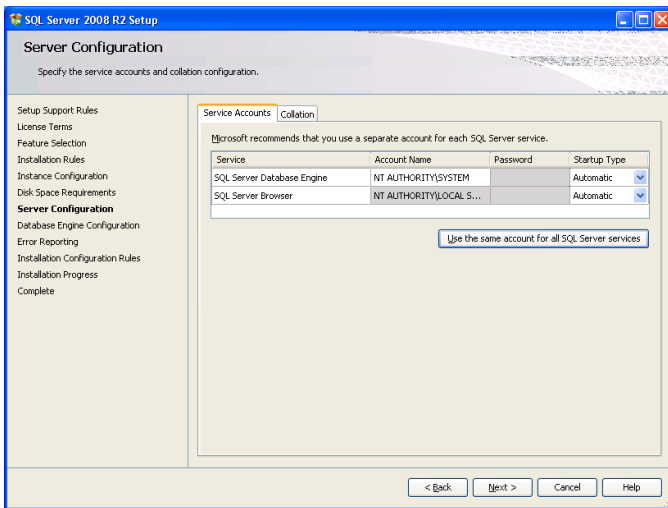

10. Select **Use the same account for all SQL Server services**.

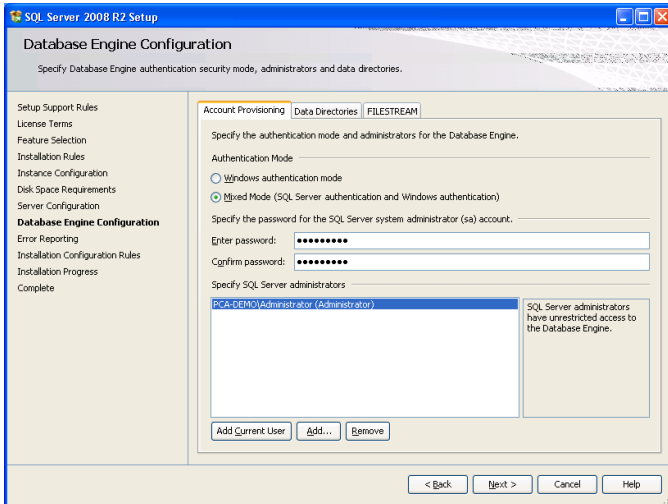

11. For the **Account Name** field, use the dropdown to select **NT AUTHORITY\SYSTEM**.

12. Select **OK**.

13. The information you entered in the previous step should populate in the **Account Name** column.

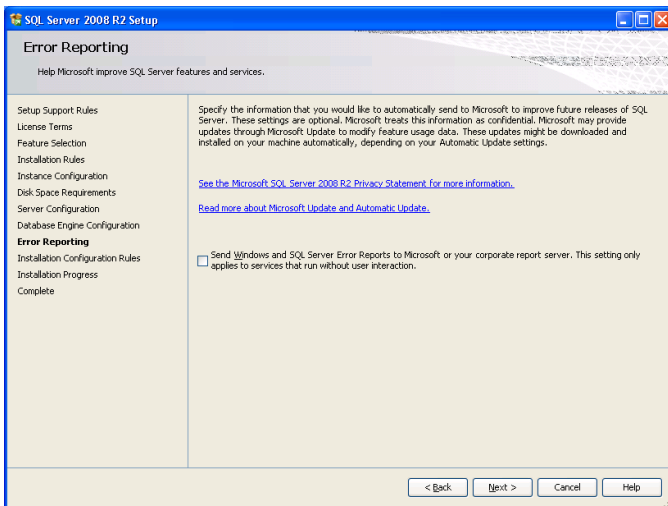

14. Select **Next**.

15. Select Mixed Mode and enter the following password, two times:

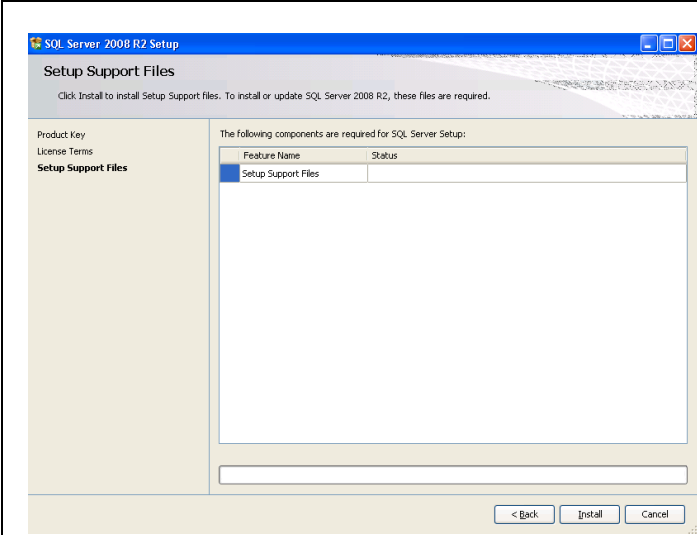

pcAmer1ca

16. Select **Next**.

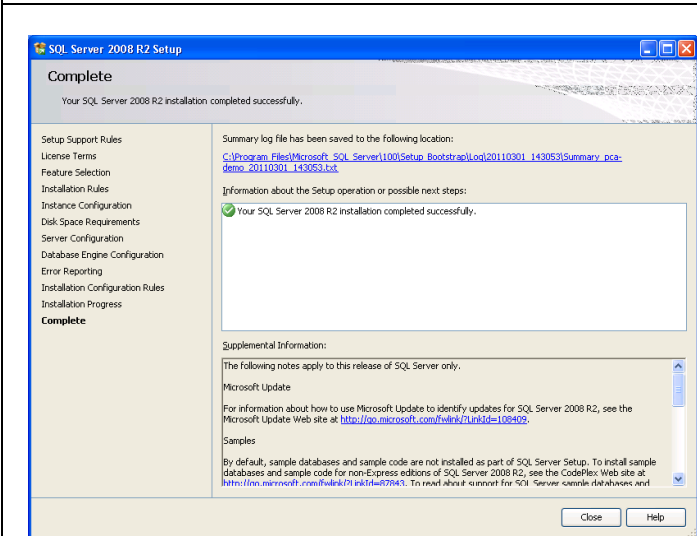

17. Un-check **Send Windows and SQL Server Error Reports...**

18. Select **Next**.

19. Select **Install**.

After the Installation has completed you will receive notification.

20. Select **Close**.
