## Honeywell Xenon 1900 with Easy DL

---

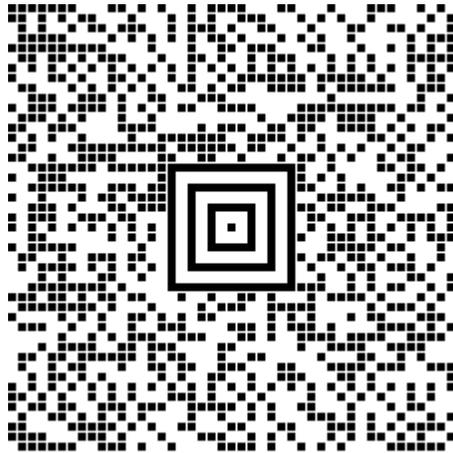

Your scanner must have an “EZ” or “DL” designation somewhere by the item number for the license scanning to work correctly. For example, **1900GSR-2-EZ** supports license scanning, but **1900GSR-2** does not.

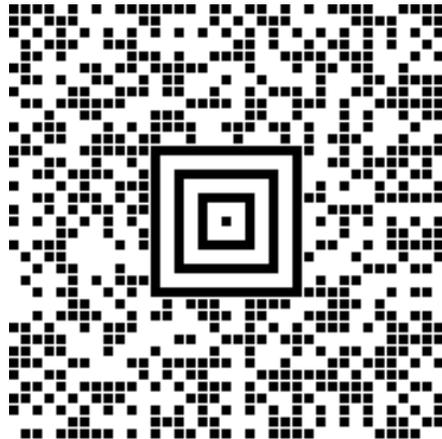

## Programming the Scanner

In order to program the scanners to work correctly with CRE/RPE we have included a special programming barcode below. Simply scan the barcode and the scanner will be configured correctly to work with our software.

Print this document and scan the below barcode to auto-program the Honeywell Xenon 1900 to scan drivers licenses.

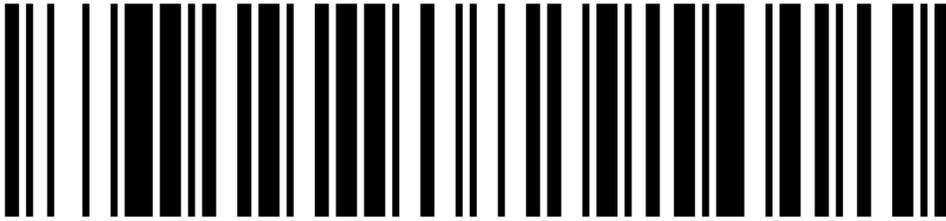

Print this document and scan the below barcode to auto-program the Honeywell Xenon 1900 with Easy-Z DL 2.0 to scan drivers licenses.

The scanner is now programmed to scan licenses correctly with CRE/RPE.

If no carriage return is being sent after scanning barcodes please scan the barcode below:

The above barcode will add a carriage return (same as hitting enter on your keyboard) after scanning a barcode.

## Configuration in CRE/RPE

First, you need to enable an inventory item to check for the ID when added to the invoice.

1. Select **Manager/Options** (enter credentials) > **Administrative** > **Inventory Maintenance**
2. Find your item that will need an ID prompt, and check **Check ID Before Selling**. **Check ID #2 Before Selling** can also be checked if it applies, which will be explained in the sections below.

Check ID -- Birthday Prompt

Level 1 -- Age: 21 Level 1 -- Prompt: PLEASE CHECK ID.

Level 2 -- Age: 0 Level 2 -- Prompt: PLEASE CHECK ID.

Scale Update Exit

Next, you need to make sure that CRE/RPE is setup to prompt for a birthday when selling an item. The option you will set will allow you to set the minimum age allowed for the sale of the item you previously checked before.

3. Select **Manager/Options** (enter credentials) > **Setup** > **Setup Screen**
4. Select the **Inventory** tab and check the **Check ID – Birthday Prompt**
5. Below this option, you will see **Level 1 – Age, Level 2 – Age, Level 1 – Prompt, Level 2 – Prompt**. You will enter the age you would like in both levels and the prompts the cashier will see when scanning an item that requires an ID check.

6. When finished with your selections, hit **Update** to save your changes.

**Explanation on Check ID – Birthday Prompt and the Level 1 and Level 2 fields:**

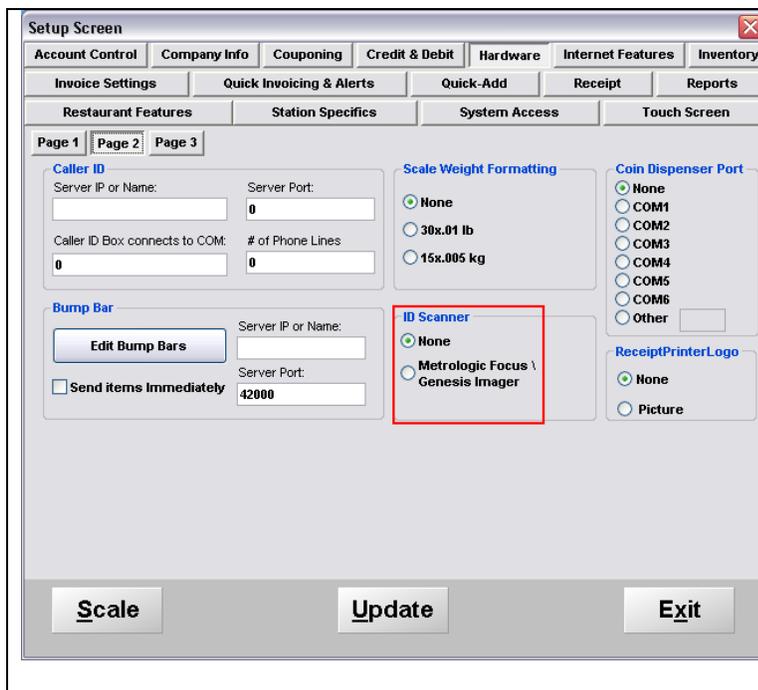

After you select **Check ID – Birthday Prompt** you will notice that there are two levels with empty fields: **Level 1** and **Level 2**. These fields create the required ages. These are also the fields that relate to the inventory item that you checked for either **Check ID Before Selling** or **Check ID #2 Before Selling**.

**For Example:**

If you place **21** for Alcohol in the **Level 1** – that means when the inventory item checked for **Check ID Before Selling** is scanned, it will prompt for you to check the ID of the customer and if the customer is 21 years or older, the item can be sold to them.

If you place **18** for cigarettes in the **Level 2** field, that means that an item checked for **Check ID #2 Before Selling** will look for a birthday that is either 18 years or older.

How the Levels relate to the inventory options:	
Level 1 – Age	Check ID Before Selling
Level 2 – Age	Check ID #2 Before Selling

Now, you need to enable CRE/RPE to recognize the specific ID Scanners.

7. Select **Manager/Options** (enter credentials) > **Setup** > **Setup Screen**
8. Select the **Hardware** tab, then **Page 2**
9. Under **ID Scanner**, select **Metrologic Focus/Genesis Imager**
10. Select **Update** to save changes

CRE/RPE is now configured correctly to use your ID Scanner.

## Granting/Denying an Employee the Permission to Bypass the Birthday Prompt

The screenshot displays the 'Employee Maintenance' application window. At the top, it shows 'General Information For: Feras' with a 'Keyboard' button. Below this are fields for Department, Employee ID (01), Card Swipe ID, Customer (101), Password, and Hourly Wage (\$0.00). There are also checkboxes for 'Disable this Employee', 'Require Clock-In Before Login', and 'Administrative Card Access'. The 'Permissions' tab is active, showing a list of functionality categories on the left and a table of permissions on the right. The 'Handheld' category is selected, and the 'Override ID Scan' permission is highlighted with a red box, showing a value of 'No'. At the bottom, there are buttons for 'Add Employee', 'Save Changes', 'Job Code Setup', 'Time Clock Management', 'Previous', 'Next', 'Help', 'Duplicate', 'Delete', and 'Exit'.

Functionality	Page 1	Page 2	Page 3
Inventory			
Customers			
Reports			
Setup			
Restaurant			
Handheld			
Delete Sent Items	Yes		
End Cash Transactions	Yes		
End Account Transactions	Yes		
Force Checks	Yes		
Override ID Scan	No		

The birthday prompt can be bypassed by an employee whose permission for **Override ID Scan** is set. With the employee granted permission, they will be able to select **SKIP** when prompted for the customer's birthday.

To set this permission, follow these steps:

1. Select **Manager/Options** (enter credentials) > **Administrator** > **Employee Maintenance**
2. Select **Functionality** category on the left, then **Page 3**. You will see this permission on the bottom of the list.
3. After selecting the appropriate permission, save your changes and exit the Employee Maintenance screen.

## Adding a Customer's Info by Scanning a License

In customer maintenance you can create a customer and input all of their address and contact information by simply scanning the license.

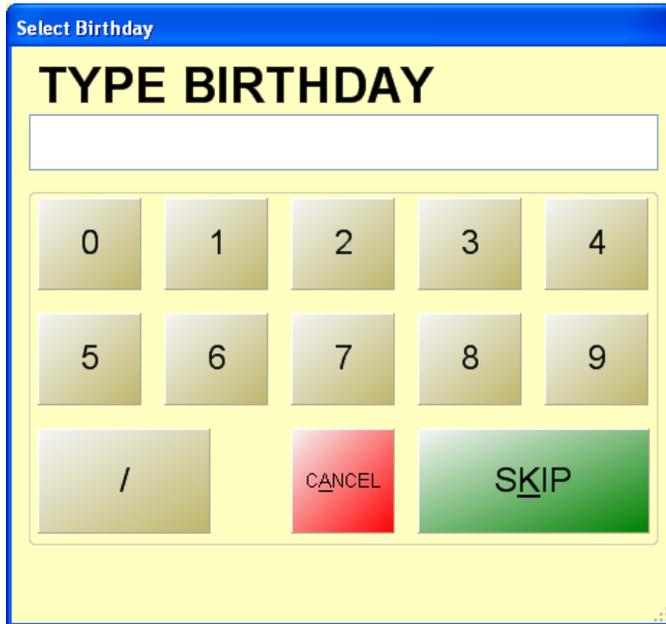

To do so, follow these steps:

4. Select **Manager/Options** (enter credentials) > **Administrator** > **Customer Maintenance**
5. Select **Add** so you can create a new customer then on the top left, select **Scan License**
6. After selecting the appropriate permission, save your changes and exit the Employee Maintenance screen.

When you select **Scan License**, a popup screen will appear prompting you to scan the license.

7. All fields will be filled for the Customer's name, address, and contact information
8. Select **Save** when you are finished adding the customer

## Selling an Item that Requires the Checking of ID

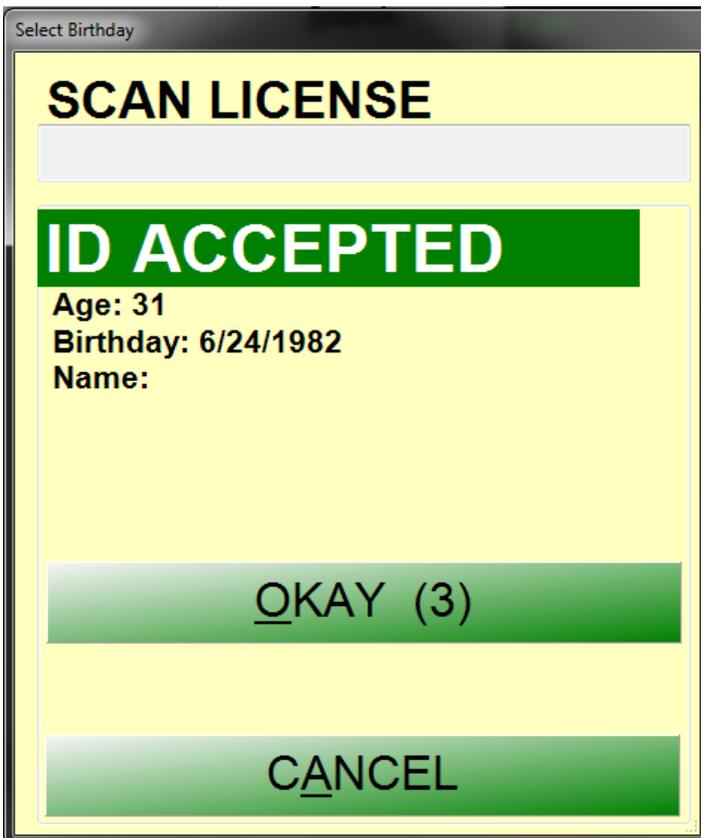

The image shows a software dialog box titled "Select Birthday" with a blue header bar. The main content area has a yellow background and is titled "TYPE BIRTHDAY" in large, bold, black letters. Below the title is a white text input field. Underneath the input field is a numeric keypad with buttons for digits 0 through 9, a forward slash (/) button, a red "CANCEL" button, and a green "SKIP" button.

While scanning items requesting an ID check, a box will appear like the image to the left.

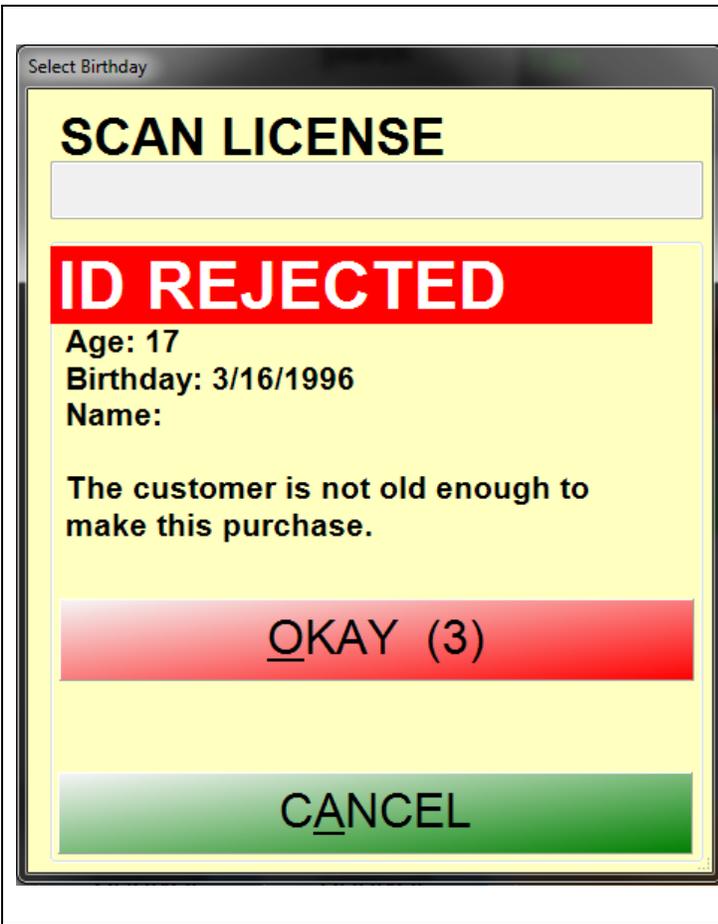

Within this prompt, you can either manually enter the birth date or you can scan the license with your ID Scanner.

If the employee's permission is set to **Yes** or **Override**, the employee will be able to **Skip** this box.

The image shows a software dialog box titled "Select Birthday" with a grey header bar. The main content area has a yellow background and is titled "SCAN LICENSE" in large, bold, black letters. Below the title is a grey rectangular area. A green banner with white text reads "ID ACCEPTED". Below the banner, the following information is displayed: "Age: 31", "Birthday: 6/24/1982", and "Name:". At the bottom of the dialog, there are two green buttons: "OKAY (3)" and "CANCEL".

If the customer's birth date is **ACCEPTED**, you will receive a box like in the image to the left.

If the customer's birth date is **REJECTED**, you will receive a box like in the image to the left.
